Aptech Computer Education

Korangi Center

ACKNOWLEDGEMENT

First of all we would like to thank ALLAH the almighty who make us able to complete this project.

After that we would like to express profound gratitude to our internal project advisor, Center

Faculty, ***Sir Ibrahim*** Warsi, for her precious support, back-up, supervision and useful suggestions

throughout this project. Her moral support and continuous help enabled us to complete our work

successfully. We are also highly thankful to the ***Center Management*** for their valuable

suggestions, healthy analysis and support throughout this project. We are grateful to the faculty

members of Aptech Korangi Center who were always there to help us despite of their personal

workload. We are as ever, especially indebted to our parents for their love and support throughout

our life. We also wish to thank our classmates, friends and all the individuals or groups that were

involved in this project by any mean**.**

Summary

marina Fleet is a professional marine services company dedicated to providing reliable

and efficient fleet management solutions. The company offers a wide range of services,

including vessel operations, maintenance, logistics support, and maritime transportation.

By focusing on safety, quality, and operational excellence, Marina Fleet helps clients

improve performance while reducing operational risks and costs. Its experienced team

uses modern technology and industry best practices to ensure smooth and dependable

services. Committed to customer satisfaction and sustainable operations, Marina Fleet

strives to build long-term partnerships with clients by delivering tailored solutions that

meet the evolving needs of the maritime and offshore industries.

HOME PAGE

The Marina Fleet home page provides an attractive introduction to the company and its

marine services. It features a modern design with high-quality images of yachts and

highlights the company’s commitment to delivering safe, comfortable, and memorable

sea experiences. The homepage presents key sections such as featured yachts, pricing

plans, popular destinations, and service highlights, allowing visitors to quickly explore

available options. It also includes easy navigation, contact information, and calls to action

that encourage users to book a trip or learn more about the company's offerings. Overall,

the homepage is designed to create a professional first impression and provide visitors

with all the essential information in a simple and engaging way.

Marina Fleet – Features and Functionalities

1. User-Friendly Interface – The website has a clean and easy-to-use design for smooth navigation.

2. Responsive Design – It works well on desktops, tablets, and mobile phones.

3. Navigation Menu – Users can easily access pages such as Home, About, Services, Fleet, and Contact.

4. Fleet Information – Displays details about available boats, yachts, or marine vessels.

5. Service Information – Explains the marine services offered by the company.

6. Image Gallery – Shows high-quality images of the fleet and marine activities.

7. Contact Section – Provides contact details and a form for customer inquiries.

8. Call-to-Action Buttons – Buttons like Book Now, Contact Us, or Learn More encourage user interaction.

9. Fast Performance – Pages load quickly for a better user experience.

10. Professional Layout – The website uses a modern design that creates a strong first impression and improves reade

Introduction

Welcome to Marina Fleet

Marina Fleet is a trusted maritime service provider dedicated to delivering excellence in marine transportation and fleet management. We offer reliable, safe, and efficient solutions for individuals and businesses seeking high-quality marine services. With a commitment to professionalism, customer satisfaction, and operational excellence, Marina Fleet ensures every journey is smooth, secure, and memorable. Our experienced team and modern fleet are focused on providing outstanding service while maintaining the highest standards of safety and performance.

OBJECTIVE

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application. The objective is not to teach you topic but to provide you with a real-life scenario and help you create basic applications using the tools. You can revise these chapters before you start with the project. These programs should be done in the Lab sessions with assistance of the faculty if required. It is very essential that a student has a clear understanding of the subject. Kindly get back @ eprojects@aptechfze.ae in case of any doubts regarding the application or its objectives.

Technology Used

In order to meet the requirement of our project we have used following underlying technologies

I. HTML 5

II.CSS 3

III. Bootstrap-5

IV.Java Script

V. J-query

VI.Font-Awesome

VII.C# ASP .Net Core-08

VIII.SQL Server

Filters:

Allow filtering based on categories, locations, availability, price range, and more.

User Registration and Authentication:

Account Creation: Users can create accounts using email or social media accounts.

Login and Password Reset:

Implement secure login functionality and offer password reset options.

Social Media Integration:

Allow users to log in with social media accounts like Facebook, Google, etc. Food Court Listings:

Comprehensive Details:

Provide detailed listings of food court vendors including name, description, cuisine type, location, opening hours, and contact information.

Search and Filter:

Users can search and filter vendors based on cuisine, location, availability, and price range. Movie Booking:

Showtime Listings:

Display comprehensive movie listings with showtimes, descriptions, and ratings.

Seat Reservation:

Allow users to view available seats and book movie tickets for specific dates and times.

Confirmation and Notifications:

Send confirmation and reminder notifications via email or SMS. Shop Listings:

Detailed Shop Information:

Provide comprehensive details about shops, including name, description, products/services offered, location, and contact information.

Search and Filter:

Enable users to search and filter shops based on product categories, location, and price range.

Appointment Booking:

Allow users to book appointments with specific shops or services. Reservation Management:

Food Court and Shop Reservations:

Users can view available reservation slots and make reservations for specific dates, times, and party sizes.

Modify or Cancel Reservations:

Allow users to modify or cancel their reservations easily.

Confirmation Process:

Notify users about the status of their reservations. Table Management for Food Court

: **Track Table Availability:**

Implement a system to track table availability and assign tables to reservations.

Table Capacity and Layout:

Allow vendors to set table capacities and configure layouts.

Menu Display for Food Court Vendors:

Showcase Menus: Vendors can display their food and beverage offerings, including prices and descriptions.

Reviews and Ratings:

User Reviews: Allow users to leave reviews and ratings for movies, food court vendors, and shops

Rating System:

Implement a rating system for both vendors and individual menu items or products.

Restaurant and Shop Management:

Provide tools for restaurant owners or shop administrators to manage details, reservations, and inventory.

Respond to Reviews

: Allow administrators to view and respond to user reviews.

Analytics and Reporting:

Generate detailed reports on reservations, popular items, customer feedback, and more.

Mobile Responsiveness:

Responsive Design

: Ensure the website is mobile-friendly and works seamlessly on various devices.

Cross-Device Compatibility:

Allow users to make reservations, order food, and shop from their smartphones, tablets, or desktops.c

Site Requirement :

Since we have used bootstrap framework, it might have certain compatibility issues. We used the latest version of the framework and yet it has certain limitation. Below-mentioned is the compatibility chart for bootstrap. We highly recommend this website to be opened on “Google Chrome” due the best compatibility available.[5]

Website structure

Bootstrap Grid System Since we have used bootstrap framework for website. Grid layout[6] making technique have been used in our website. For review, I have mentioned the basic structure of grid system which we have used in our project.
Table 1: Bootstrap Grid Information

Website functionalities explanation:

Functionalities are explained module wise:

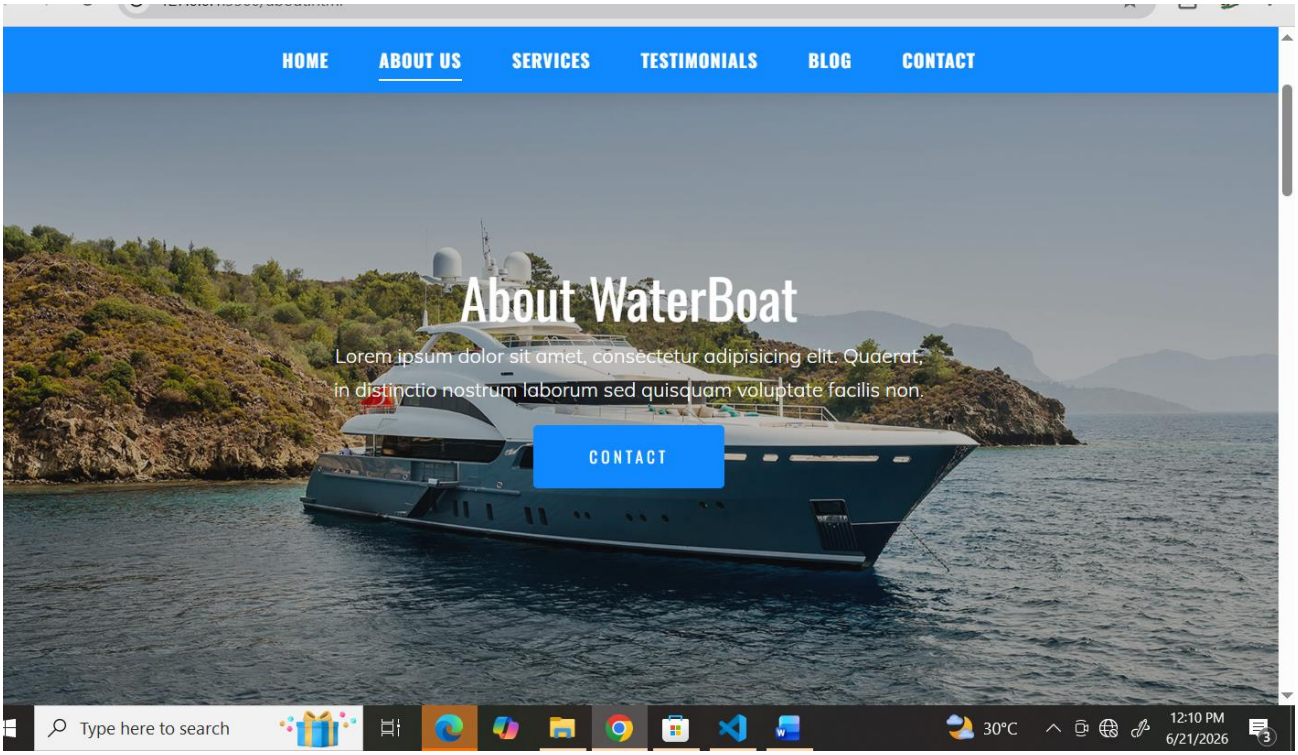

Admin Module:

 Admin will have to login in the website to edit the features. Will have the authority to ADD-EDIT-DELETE the content such as shopping centers (along with the list of few items it possess), counters at food court (can add some of the items). Can add the details in the gallery section where the top brands item, or food image is presented Can view the feedback received by the client users. Will have the authority to ADD-EDIT-DELETE the movies which would be running on the multiplex also number seats available must be added. Can view the tickets booked by the clients.

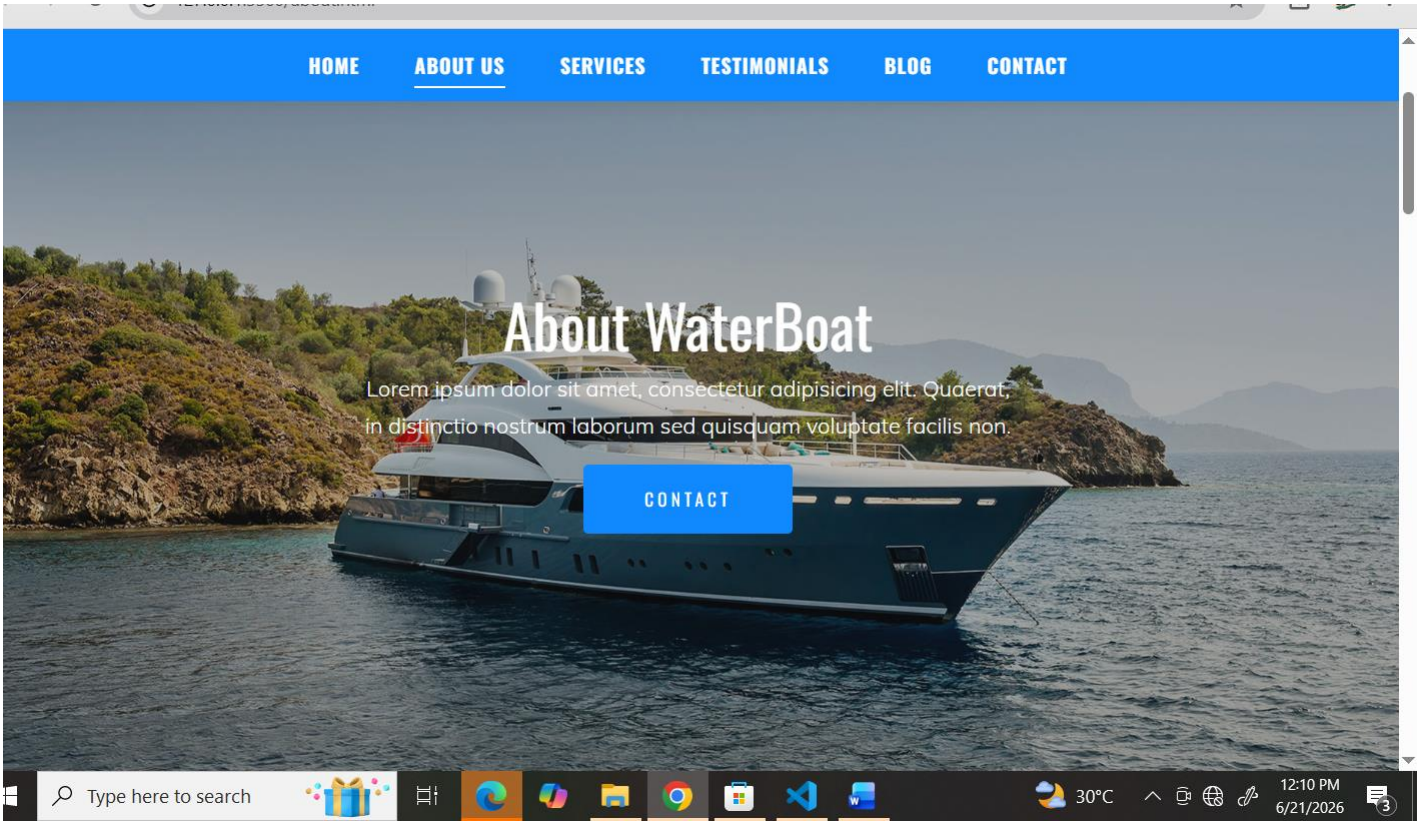

Client Module

: The client can view the website but will not any login section. They can view the data like list of the shopping centers, food courts, galleries, contact us details They can provide the feedback They can book the ticket online by providing the card details. (note if all the allocated seats are booked then it must not allow to book the tickets.) Can search the name of the brands shops available, also in the food courts menu. Can view the complete diagram of the mall Can view the contact details. 14 | P a g e

Conclusion

: The development of an advanced Mall Management System that integrates online movie booking, detailed food court information, and comprehensive shop listings marks a significant leap in enhancing the shopping and entertainment experience for customers. This system, designed to streamline operations and elevate customer convenience, offers numerous benefits that contribute to its overall effectiveness and appeal. The online movie booking feature stands out as a crucial component, allowing users to browse movie schedules, check seat availability, and book tickets from the comfort of their homes or on-the-go via mobile devices. This not only saves time but also reduces the hassle associated with traditional in-person bookings. With real-time updates, customers can make informed decisions about their movie plans, ensuring they never miss out on the latest releases. Secure payment gateways make transactions safe and efficient, fostering trust among users. The convenience of selecting preferred seats, viewing trailers, and reading reviews further enhances the movie-going experience, attracting a larger audience and benefiting the mall's cinema operators through increased foot traffic and revenue. The inclusion of detailed food court information is another vital aspect, providing a comprehensive overview of all available dining options within the mall, complete with menus, pricing, and customer reviews. This transparency helps visitors make informed dining choices that cater to their tastes and dietary preferences. Real-time updates on promotions, special offers, and new menu items encourage customers to explore various food options, enhancing the dining experience and making the mall a more attractive destination for food enthusiasts. Showcasing the diversity and quality of food court offerings drives increased patronage, ultimately benefiting both the mall and its tenants. The comprehensive shop listings provide a detailed directory of all retail stores within the mall, including store locations, operating hours, product offerings, and contact details. This ensures that customers can easily find and navigate to their desired shops, improving their shopping experience. By categorizing stores based on their offerings—such as fashion, electronics, home goods, and more—the system allows users to quickly locate the types of stores they are interested in. Featuring special promotions, sales events, and new arrivals within these listings attracts more customers to the mall, benefiting retailers through increased visibility and foot traffic, which can translate to higher sales and customer engagement. The Mall Management System significantly enhances customer engagement and satisfaction by providing a user-friendly interface that integrates movie

booking, dining information, and shopping directories. The ease of accessing all necessary information in one place simplifies planning and decision-making for customers, leading to higher levels of satisfaction and repeat visits. The system's ability to gather and analyze data on customer preferences and behaviors enables mall management to tailor their services and promotions more effectively. Personalized recommendations, targeted marketing campaigns, and loyalty programs can be developed based on this data, fostering a stronger connection between the mall and its patrons. From an operational standpoint, the system contributes to increased efficiency and growth. By automating various processes such as ticket booking, information dissemination, and customer feedback collection, the system reduces the workload on staff and minimizes the potential for human error, allowing mall management to focus on more strategic initiatives aimed at improving the overall visitor experience. The data generated provides valuable insights into customer preferences, peak visiting times, and popular services, enabling mall operators to make data-driven decisions. These insights can guide future developments, such as the introduction of new stores, renovation of existing facilities, or the launch of targeted marketing campaigns. Overall, the
